# The Microvisioner InstaSlide Software

Share digital slides within seconds with anyone, anywhere

Microvisioner InstaSlide is a software to share folders of virtual slides instantly with remote parties. InstaSlide makes virtual slides available as websites immediately without uploading them to a cloud server.

It is a simple slide sharing solution which works especially well in areas with slow internet connections or in closed local networks.

The slides can be viewed from any distant location, with any device with a browser. Together with the Microvisioner manualWSI slide scanning software, InstaSlide represents a complete telemicroscopy solution.

## Slide sharing with InstaSlide

- 1** Install and run InstaSlide on your computer. Start the application. InstaSlide needs to run on the computer that contains the digital slides that are supposed to be shared.

- 2** Select and share scans. Drag a folder containing the selected scans into InstaSlide. Thereby, a worldwide accessible URL is created within seconds, representing the content of the folder. The URL can be shared with anyone who is supposed to view the slides.

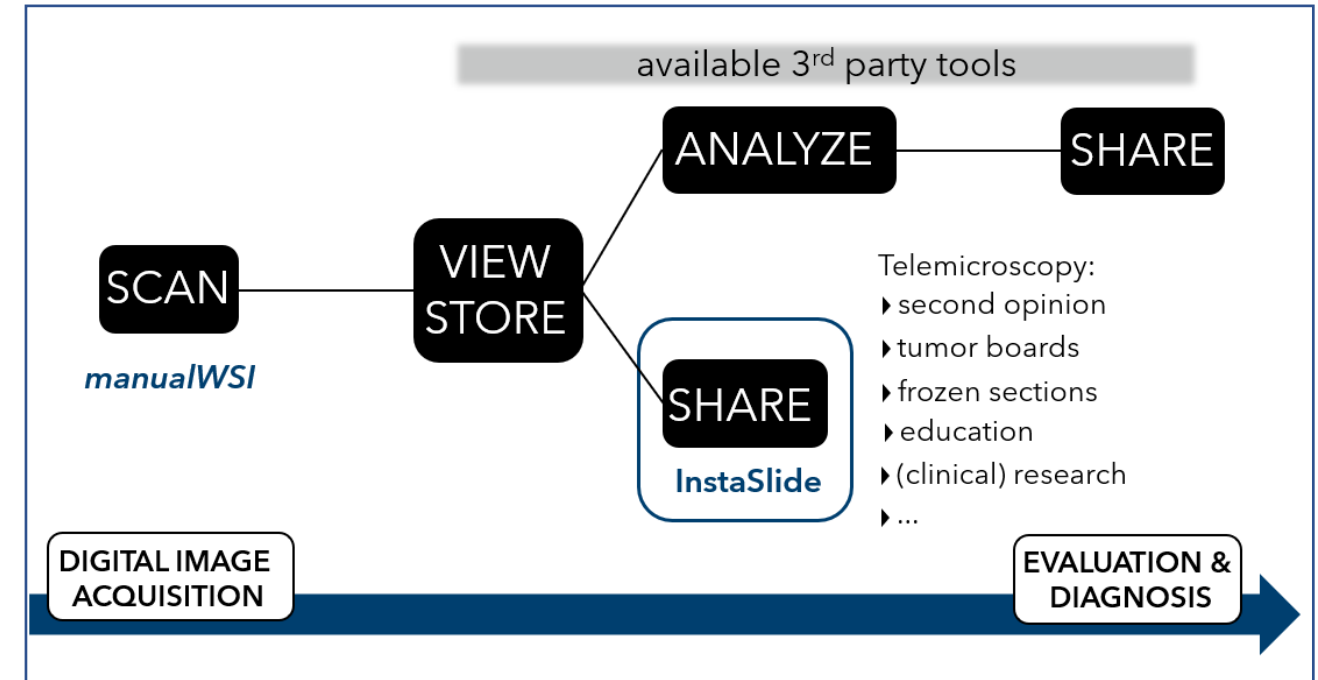

- 3** View the shared zoomable whole slide images. Everyone receiving the URL can view the virtual slides now. Nothing else than a web browser is needed. The scans can be viewed as a zoomable website on any device such as computers, tablets or smartphones. The capacity of the InstaSlide slide server is unlimited. You can share hundreds of slides within seconds.

# The Digital Pathology Workflow with InstaSlide

The easy transition to fully digital workflows

## Benefits of InstaSlide

**Read slides anywhere**  
There is no need to visit remote sites. Save your precious time and simply ask a colleague to scan slides and share them instantly via InstaSlide. Slides are accessible with any device at any location.

**Share slides with anyone**  
Share difficult slides with your colleagues for a second opinion. They just need a web browser to have a look at the scans.

**Save time**  
Common upload of scans to pathology cloud platforms takes a lot of time. InstaSlide shares even terabytes of virtual slides within seconds. Sharing and reading slides via InstaSlide is extremely fast, even with slow internet connections.

**Maintain image quality**  
The InstaSlide web viewer does not use the traditional screen sharing technology often used by telemicroscopy solutions. As a result, the image quality is superior to traditional techniques.

# Specifications

Key technical features of Microvisioneer InstaSlide

<b>InstaSlide Versions</b>	Microvisioneer InstaSlide makes folders of virtual slides available as websites without uploading them to a cloud server. There are two versions of InstaSlide available.
<b>Standard Version</b>	Makes scans available via a web URL
<b>LAN Edition</b>	Makes scans available in a local network only
<b>Supported file types</b>	InstaSlide supports sharing images in *.svs and *.tiff file format
<b>Scan accessibility</b>	Scans are accessible while InstaSlide is running. Disable automatic sleep mode of computer; Add InstaSlide to autostart configuration
<b>Supported remote devices</b>	Any device with a browser
<b>InstaSlide URL validity</b>	Infinite, also after computer restart
<b>InstaSlide URL encryption</b>	Unique, encrypted URL creation

Microvisioneer InstaSlide is for research use only.

# Microvisioneer Product Range

Find your solution

## Microvisioneer manualWSI Brightfield Edition

Manual scanning for brightfield applications, oil immersion, polarized light and phase contrast. Suitable for histology, immunohistochemistry, cytology, material science and many more.

## Microvisioneer manualWSI Fluorescence Edition

Manual scanning for brightfield applications *plus a special mode for fluorescence scanning*. Both single channel and multi channel fluorescence imaging is possible. Fluorescent slides can be scanned at low costs and high quality with the existing equipment.

## Microvisioneer InstaSlide Slide Sharing Software

Immediate sharing of virtual slides via the internet with anyone, anywhere. A Microvisioneer telemicroscopy solution.
